Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Applicants have claimed an ordered liquid crystalline phase cleansing composition comprising:
 - (a) about 3 to 30% by weight of a surfactant system including at least one surfactant selected from an anionic, amphoteric, cationic and nonionic surfactant and mixtures thereof, wherein at least one anionic surfactant must be present;
 - (b) about 0.1% to 15% by wt. of an ordered liquid crystalline phase inducing structurant;
 - (c) about 0.1% to 10% of a cationic polymer;
 - (d) an effective concentration of a solid particulate optical modifier for exhibiting a specific set of optical properties on skin characterized by a set of Tristimulus Color Values L, a*, and b*; a reflectivity change, and an opacity change, that provides at least a 5% change in at least one of the specific optical properties when said cleansing composition is applied to skin and then rinsed off using the In-vitro Visual Assessment Protocol;
 - (e) wherein said ordered liquid crystalline phase composition has a viscosity of about 40,000 to about 300,000 cps at 25 C as measured via the T-bar method; and
 - (f) wherein said ordered liquid crystalline phase composition contains less than about 0.025% by weight of an organic, non crosslinked, cationic homopolymer or copolymer having a cationic charge density of from about 2 meq/gm to about 10 meq/gm and an average molecular weight of from about 1,000 to about 5,000,000.

The closest prior art of Yamazaki, EP 1,384,470 teaches skin cleansing compositions comprising an anionic surfactant at 5 to 40wt%, a cationic polymer at 0.5 to 20wt%, and at least one skin-residual substance selected among cosmetic powders and liquid oils, and mixtures at 0.1 to 20wt%. Though Yamazaki broadly discloses the optional inclusion of components that may be considered structurants, he does not specifically teach a structured composition, and thus, does not meet this claim limitation. It would not have been obvious to one of ordinary skill in the art to formulate a structured composition containing the other components of the present claims based on the teachings of the prior art. Accordingly, the present claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
